

# Chinese Taipei's Responses to Global Energy and Environment Issues

**David S. Hong**  
**President, Taiwan Institute of Economic  
Research**

# Paradigm vs. Anomaly

- Paradigm: Sustainable Development
- Anomaly: Economic and Environmental Optimization
  - Kyoto Protocol
  - Chinese Taipei's Responses

# Economic Development

- Historical View on Chinese Taipei's Development
- Chinese Taipei's Industrial Structure
- Energy Supply is Necessary

# Energy Security

- Formation of Energy Commission
- Bureau of Energy
  - Energy Policies
  - Multiple Functions

# Energy Policies

- Petroleum Administration Law
  - Managing Imports of Petroleum Products
- Renewable Energy Development Plan
  - Developing Renewable Energy
- The Purpose of Energy Policies

# Environmental Protection

- Reducing Greenhouse Gas Emissions
- Chinese Taipei's Voluntary Actions
  - Environmental Protection
  - International Sanction Prevention
  - Global Competitiveness Enhancement
  - Adjustment Period

# Renewable Energy

- Most Feasible Solution
- Sustainable and Clean Source
- Adopting Relevant Measures
- Example of Achievement

# Energy Conservation

- Economic Development vs. Environmental Protection
- Adopting Feasible Measures
- No-regret Measures
- Critical and Much Needed Actions

Thank you
