How it works

It's not flyingV or else to create innovated ideas

Internet is just tool, KEY is disintermediation

Traditional way... Trade after manufacturing

Crowd Funding itself isn't innovation.
However, with internet, it disrupts the traditional trading

How **IMPORTANT** is it?

Rapid prototyping +
market verification +
accumulated success

Crowd Funding is
the **NEXT BIG THING**
and
Key Driver of
the Collaborative Economy

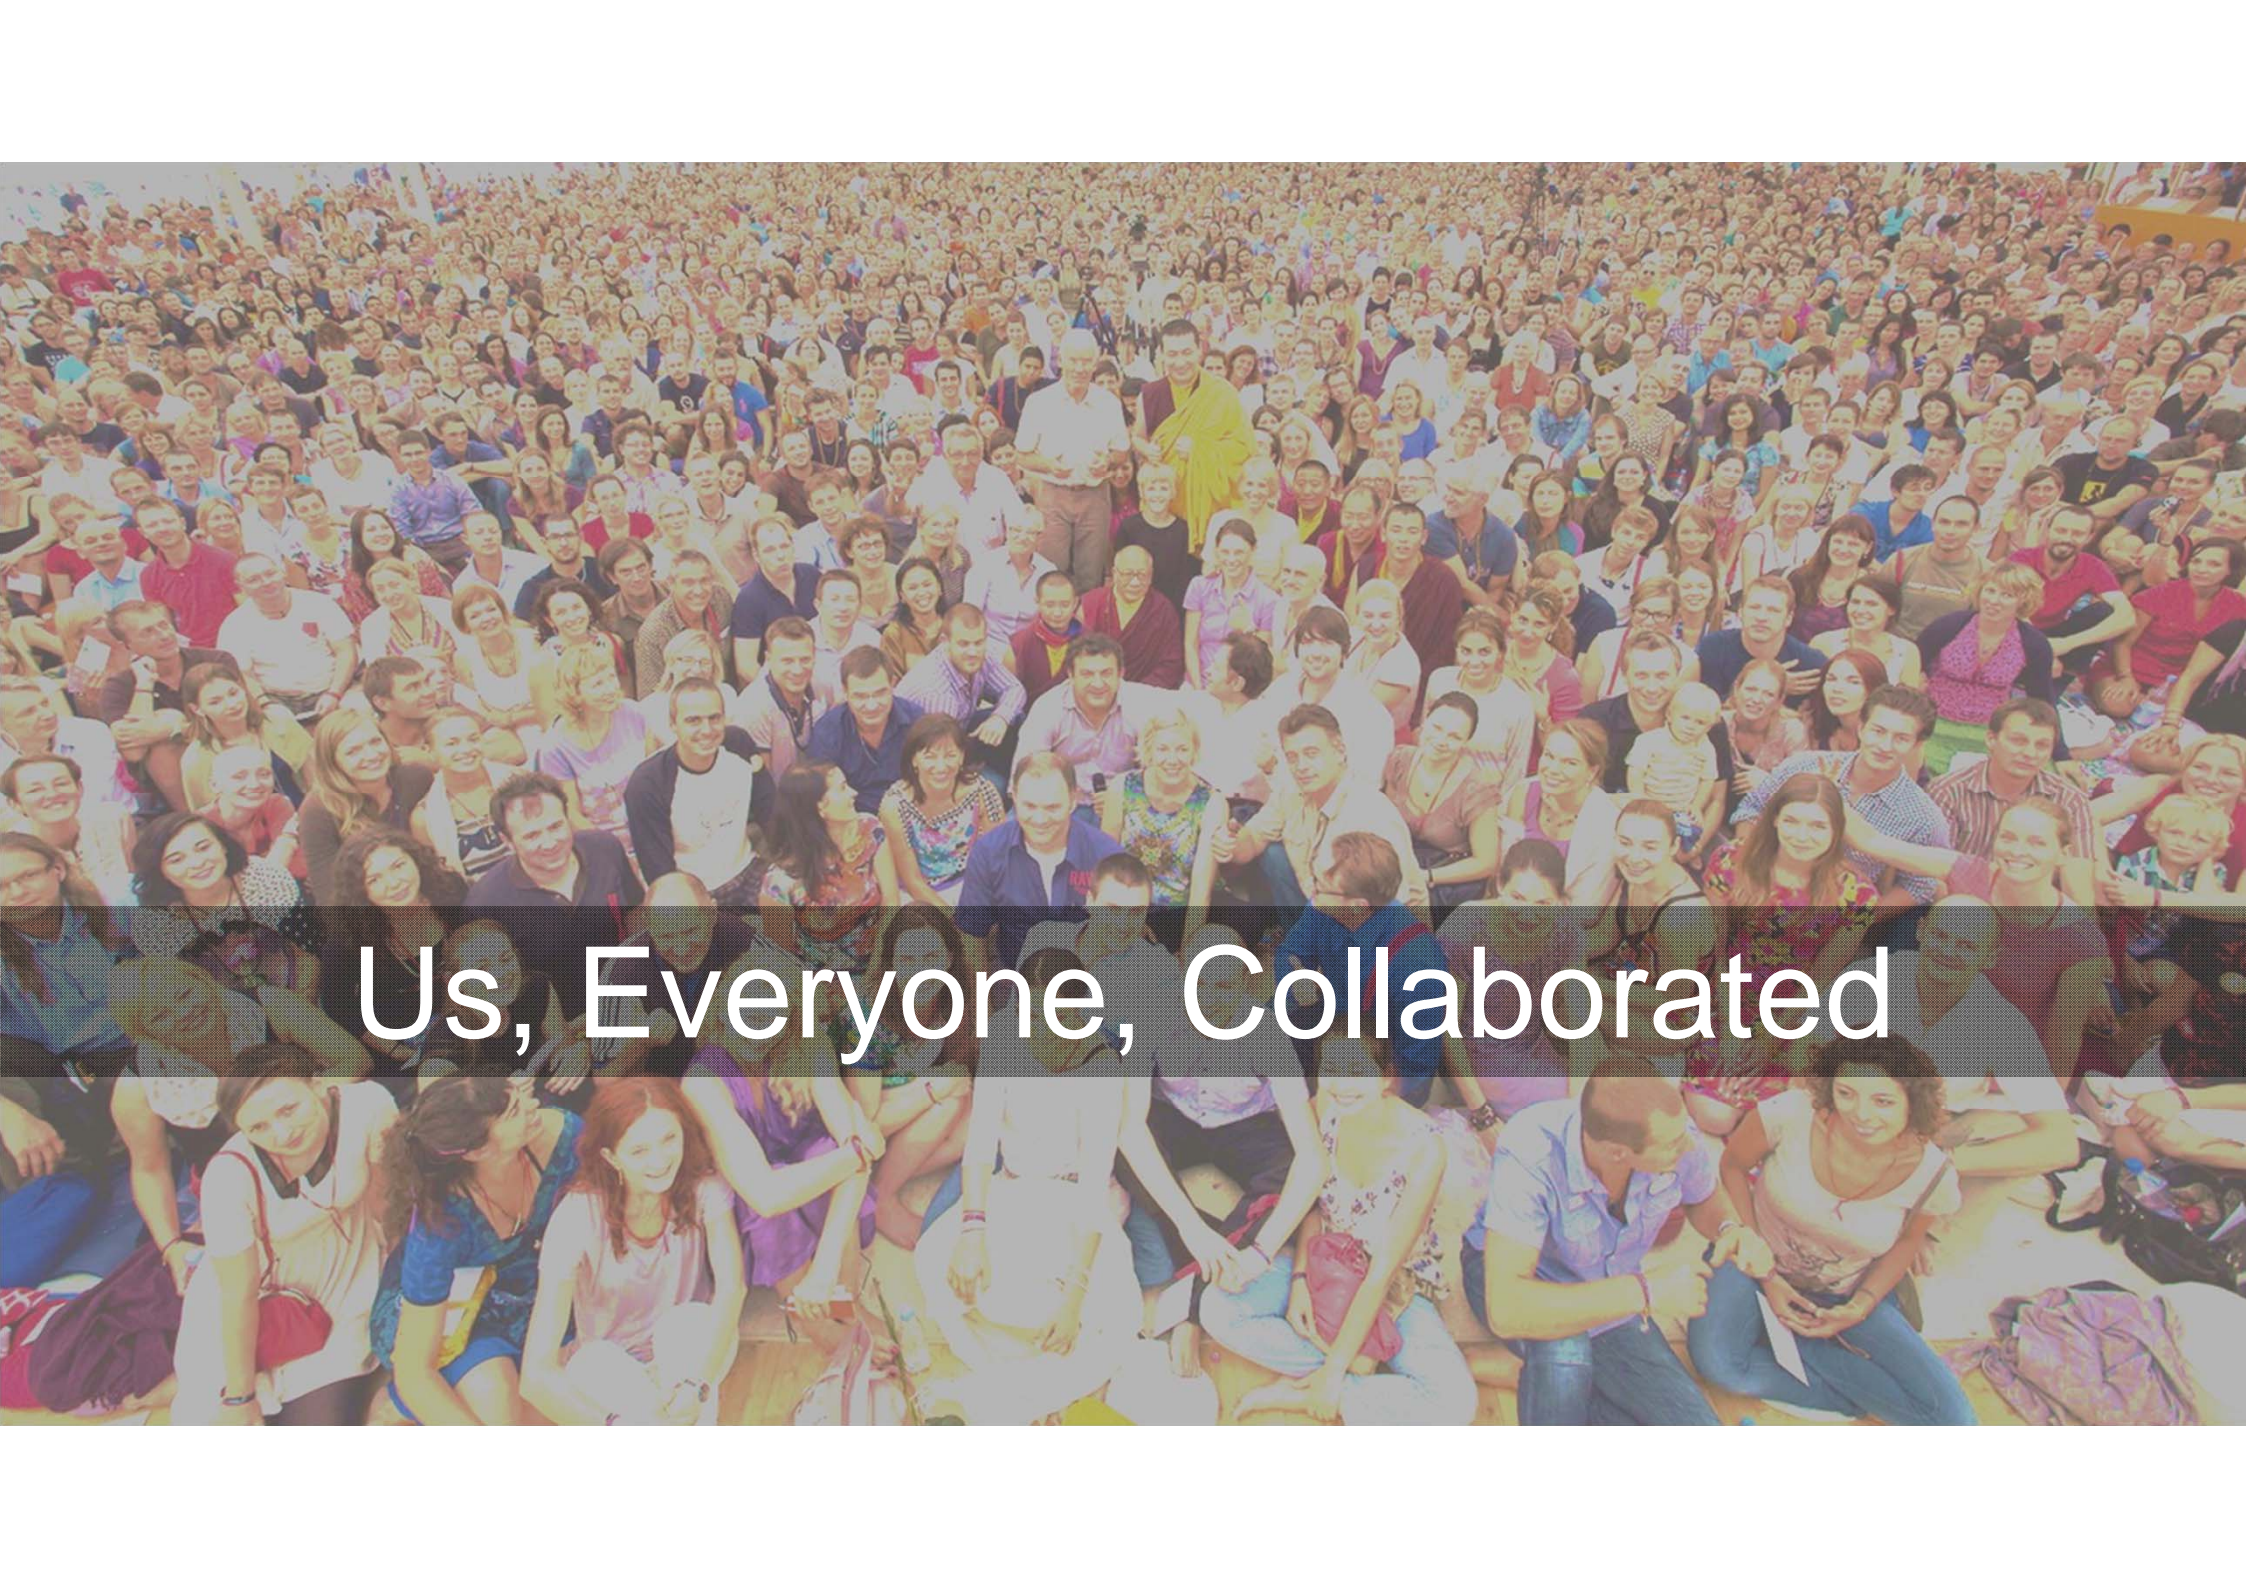

Besides economy perspective,

- We always care about those really BIG issues

It's about life or death

- However, there are still localized, not-so-big issues
 - Quality of Life, Culture etc.
- Is it necessary to care? Who to be responsible?

Us, Everyone, Collaborated

we also help many social innovation ideas

From cattle to table,
without food safety issue

10-year documentary project,
without funding

Equal rights

Halfway for stray dog/cat/animals

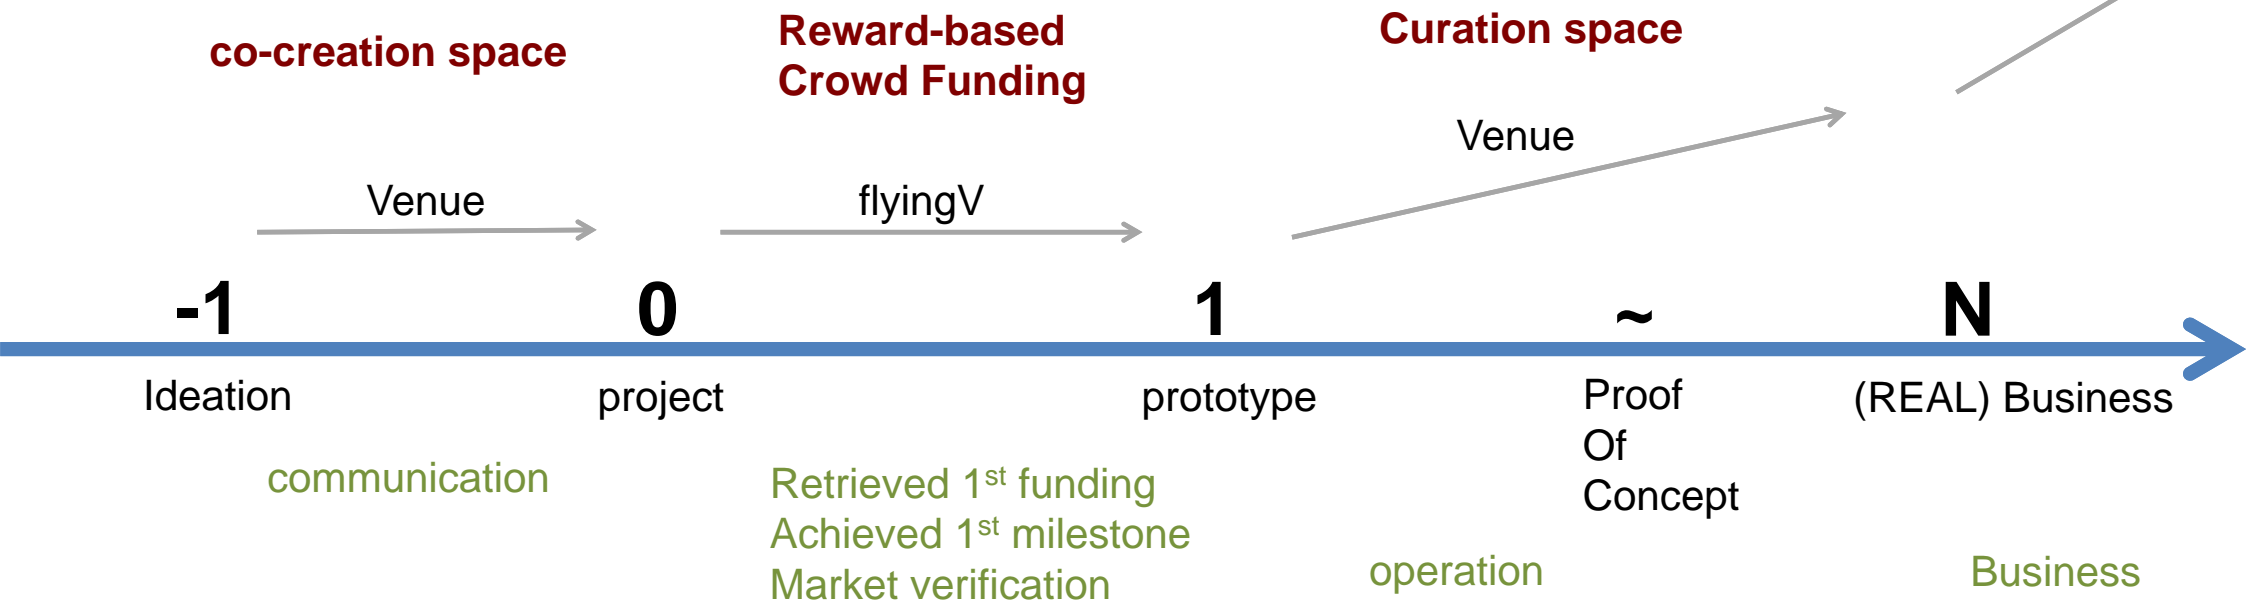

Children from native tribes

International volunteerism

and Next, To Build A New (StartUp) EcoSystem

It's not an incubator nor an accelerator,

But a Business Model

Role of the public sector?

Terrain, Directions

FOXCONN®

→ Where I am from

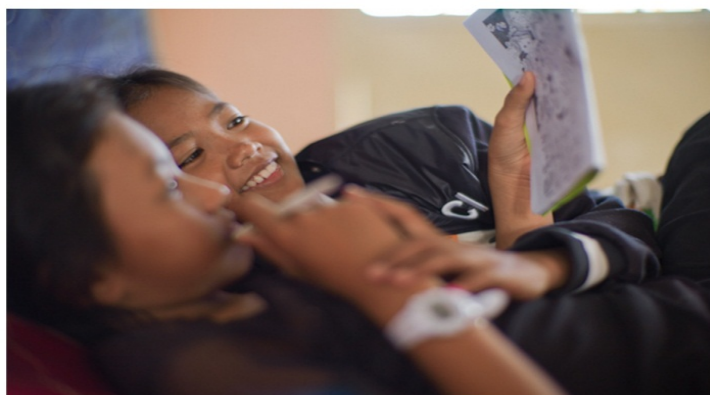

We are in the transition

- We've done these during past 6 months
 - Legislation in progress
 - Closed-Corporation Law (for SME and start up)
 - Equity Crowd Funding Act
 - Startup VISA
 - Startup reinforcement
 - T.R.I.P.L.E → Manufacturer matching platform
 - All-in-one Startup support center in Silicon Valley
 - Finance early stage investment

Best part in Collaborative Economy

A black and white photograph of two hands shaking, symbolizing collaboration and partnership. The hands are clasped together in a firm grip, with fingers interlaced. The background is blurred, focusing attention on the handshake.

Cooperation can lead us further than competition;
Just figure out our niche in the new ecosystem,
Joining forces can empower our strengths and against all odds

**Thank
You!**
